

IMMEDIATE OPENING

CLINICAL RESEARCH SCIENTIST

DESCRIPTION

An exciting opportunity for a Clinical Research Scientist position at the Orthopaedic Foundation.

MAJOR DUTIES AND RESPONSIBILITIES:

Conduct collaborative research under the direction of the Research Director, Dr. Stephanie Petterson, PhD.

Design and execute new and ongoing clinical research projects including data collection and analysis. Synthesize results and write scientific reports, papers, journal articles, and abstracts for publication and presentation at national and international conferences.

Contribute to the teaching, training, and scholarly activities of the Orthopaedic Foundation including mentoring research interns and sports medicine fellows.

QUALIFICATIONS

EDUCATION/ WORK EXPERIENCE:

Bachelor's or Master's degree in related discipline (e.g. orthopaedics, biomechanics, exercise science, rehabilitation science).

REQUIRED SKILLS:

Excellent written, verbal, and interpersonal communication skills.

Attention to detail, strong organizational skills, and an innovative approach to experimental design.

Computer literate with working knowledge of software applications (word processing, spreadsheet, and database).

Analytical ability sufficient to perform statistical analysis and compare data.

PREFERRED: A background in orthopaedics, biomechanics, exercise science, rehabilitation science or other related field is important.

BENEFITS: Commensurate with education and experience. Health insurance, 401K, and disability are available.

Please send your CV, a personal statement, and 2 letters of recommendation to:
